Perfect airing machine, creating homogenous, completely stable air bubbles in just few seconds and in a totally controllable manner, allowing continuous or instantaneous work. You can produce either small or large amounts without the need to use an electric blender. What is more, you can do it anywhere, as the device is completely portable.

Additionally, FoamKit Deluxe can produce air bubbles from as limited amount of liquid as 20 cl, allowing flavour concentration and efficiently use each portion of liquid.

In order to start, simply dissolve a portion of soya lecithin, sucrose ester or foaming agent (like BUBBLES by SOSA) in a liquid product and pour the mixture into a tall and narrow container. Place FoamKit nozzle on the bottom. Wait for several seconds, until the bubbles start to exit the container. You can now prepare as much bubbles as you need.

Switch on and off by a push of a button and maintain total control of your production. Work anywhere without any plugs or cables, as the compressor is operated by 2 batteries of 1,5 V LR20 and more than 96h of work.

Once done working, clean thoroughly the diffusing nozzle. To do this, submerge the stainless steel nozzle in water with a few drops of soap and leave it for about 5 minutes. Switch the pump on to remove the remaining product and let the water and soap work. Repeat the action with hot water until there are no soap bubbles left. FoamKit does not require any special maintenance, only battery change any time you believe it necessary. If you are not going to use the device for a longer period, we suggest that you remove the batteries. The box is can to resists splashing or humid areas, but it should not be submerged in water.

The manufacturer is responsible for the repair or substitution of your airing kit due to defect or mechanism failure provided the use, operation and maintenance has been correct and instructions in this manual has been followed. This warranty expires after 30 days. To access this agreement, a copy of the purchase invoice must be furnished. No returns will be accepted without obtaining a prior return authorization from 100%Chef.
