

Instructions

Magic Drop contains nano particles that create a thin Film on non-porous ceramic material and glass, such as plates and ceramic presentation supports.

The nano particles stick to the support, creating a water lily effect: exactly like the leaves of this Flower, the surface becomes ultra-repellent.

Drops of sauce or liquid, once positioned during plating, stand out from the surface as mercury drops. The plating is incredibly defined, the liquid spheres are regular, resulting in a trompe l'oeil effect that recalls the appearance of the spherification or of dew. Plating sauces, oils, coulis and juices is more stable, cleaner and aesthetic.

The treated surface is suitable for food contact. Use sauces based with water, oil or alcohol obtaining the same optical effect.

How does it work?

- Shake well before use.
- Clean and dry the dishes thoroughly.
The presence of grease or moisture can harm the Final result.
- To make the most of the product, prepare several dishes and supports at the same time.
- Vaporize the product evenly on the surface. Spread the product with a microfiber cloth. Let dry. Dry-to-touch in 20 minutes. Repeat the operation to ensure that the product is well distributed over the surface. Let dry.
- Respect a curing delay of 2 hours.
- Handwash with water: the dishes are ready to use.

SJ

ATTENTION!

Magic Drop is not edible and should be stored in a specific place.

The product is flammable: keep away from sources of heat, sparks, open flame and hot surfaces. Highly flammable liquid and vapor.

It causes skin irritation. Causes serious eye irritation

IN CASE OF CONTACT WITH SKIN (or hair) Remove all contaminated clothing immediately. Rinse with water

IN CASE OF CONTACT WITH EYES. Rinse carefully with water for several minutes.

The complete technical and safety information of the product is available and is supplied by the manufacturer TECNAN. S.L. Before handling the product you can consult the technical and safety data sheets for correct and safe use.
