BAKING INSTRUCTIONS

All the approximate baking times are based on a Rotary Rack Oven, for which the temperature should be adjusted to match our suggested baking time.

Temperature: 370F Time: 12 min

- > Before baking, make sure the product is not frozen hard to permit the heat to travel evenly throughout the product.
- > Bake the product to a golden brown.

Adjustments:

Once the product is baked and completely cooled, if the center of the product is not fully baked but the outside is the perfect golden brown, you'll need to lower your oven temperature.
If the product is overly dry, it is baking too slowly. You'll need to raise your oven temperature.

HANDLING INFORMATION

Storage: Keep Frozen, below 0F Shelf life: 150 Days (Frozen)
Cook thoroughly to 165°F before consumption
